Allowable Subject Matter

1. Claims 25-44 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a system for enhancing security for a self-checkout station. Each independent claim identifies the uniquely distinct features "a number of security devices; a server for receiving an event message from the self-checkout station containing an event indicative of a security violation during a transaction and self-checkout station identification information, for assigning a priority level based upon the event, and for generating an alert message containing the event and the priority level" in combination with the manner claimed, in which the claimed "priority level" is understood to be among a plurality of priority levels, as disclosed in the specification. The closest prior arts, Mason US 6,408,279 and Blackshear US 5,111,288 are not sufficiently taught or suggested the above limitations. Therefore, either singularly or in combination of arts, fail to anticipate or render the above limitations obviousness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
